

# 10mM Ammonium Acetate Aqueous Solution

Ready-to-Use Solutions | Buffer Mobile Phases

10mM Ammonium Acetate Aqueous Solution for Reversed phase/HILIC. Ready to use , Sterile filtered , pHStable , Low ion content.

## 1. Product identity and grade scope

|                   |                                        |
|-------------------|----------------------------------------|
| Product name      | 10mM Ammonium Acetate Aqueous Solution |
| CAS number        | -                                      |
| Molecular formula | -                                      |
| Molecular weight  | -                                      |
| Available grades  | USP Grade                              |
| Product category  | Buffer Mobile Phases                   |

## 2. Recommended applications

01 Reversed phase

02 HILIC

## 3. Physical and handling information

|                    |                                                                 |
|--------------------|-----------------------------------------------------------------|
| Appearance         | Confirm in the current grade-specific specification             |
| Storage conditions | Follow the current Safety Data Sheet and approved product label |
| Shelf life         | Confirm for the selected grade and packaging format             |

## 4. Consolidated packaging options

| Package size                               | Container / format                                 | Supply status        |
|--------------------------------------------|----------------------------------------------------|----------------------|
| 5L                                         | Compatible container selected by product and grade | Available on request |
| 7L                                         | Compatible container selected by product and grade | Available on request |
| 10L                                        | Compatible container selected by product and grade | Available on request |
| 20LAluminum composite bag(Nitrogen filled) | Compatible container selected by product and grade | Available on request |

All listed packaging sizes are consolidated in this TDS. Final container material, closure, minimum order quantity and availability depend on product compatibility, grade and destination market.

## 5. Storage, safety and documentation

Store in the original tightly closed compatible container under the conditions stated in the current Safety Data Sheet. Protect from incompatible materials and sources of ignition where applicable.

Transport reference: Confirm in current SDS | Hazard class: Confirm in current SDS

Available documents: Product Specification, current Safety Data Sheet, and batch-specific Certificate of Analysis. Contact the LANCHROM technical team for the controlled revision required for qualification or purchasing.

Important: This technical data sheet summarizes product information available in the catalog. It is not a Certificate of Analysis and does not replace the current grade-specific controlled specification or Safety Data Sheet.
