

Karl Fischer Reagent - Volumetric (Single Component)

Reference Standards & Analytical Reagents | Karl Fischer Reagents

Single-component (composite) Karl Fischer titrant combining iodine, sulfur dioxide, and base in one solution for simplified volumetric titration.

1. Product identity and grade scope

Product name	Karl Fischer Reagent - Volumetric (Single Component)
CAS number	-
Molecular formula	-
Molecular weight	-
Available grades	HPLC Grade
Product category	Karl Fischer Reagents

2. Recommended applications

- 01 Solvent water content QC
- 02 Simplified volumetric KF titration
- 03 Raw material moisture testing

3. Physical and handling information

Appearance	Confirm in the current grade-specific specification
Storage conditions	Follow the current Safety Data Sheet and approved product label
Shelf life	Confirm for the selected grade and packaging format

4. Consolidated packaging options

Package size	Container / format	Supply status
1L	AMBER GLASS	Available

All listed packaging sizes are consolidated in this TDS. Final container material, closure, minimum order quantity and availability depend on product compatibility, grade and destination market.

5. Storage, safety and documentation

Store in the original tightly closed compatible container under the conditions stated in the current Safety Data Sheet. Protect from incompatible materials and sources of ignition where applicable.

Transport reference: UN 1170 | Hazard class: Class 3 · PG II

Available documents: Product Specification, current Safety Data Sheet, and batch-specific Certificate of Analysis. Contact the LANCHROM technical team for the controlled revision required for qualification or purchasing.

Important: This technical data sheet summarizes product information available in the catalog. It is not a Certificate of Analysis and does not replace the current grade-specific controlled specification or Safety Data Sheet.
