

# KF Volumetric Reagent (Two-Component Solvent)

Reference Standards & Analytical Reagents | Karl Fischer Reagents

## 1. Specification scope

|                 |                                               |
|-----------------|-----------------------------------------------|
| Product         | KF Volumetric Reagent (Two-Component Solvent) |
| CAS number      | -                                             |
| Grade scope     | Controlled grade available on request         |
| Document status | Reference specification summary               |

The values below are representative catalog specifications. Where several grades are listed, acceptance limits may differ by grade. The current controlled grade-specific specification agreed at quotation or qualification is the governing document.

## 2. Test requirements

| Test item                     | Specification / reference value                         | Test method                     |
|-------------------------------|---------------------------------------------------------|---------------------------------|
| Identification                | Conforms to the approved product reference              | Approved method                 |
| Appearance                    | Conforms to the grade-specific controlled specification | Visual / approved method        |
| Assay / purity                | Grade-specific controlled limit                         | Approved method                 |
| Water                         | Grade-specific controlled limit                         | Karl Fischer or approved method |
| Residue / non-volatile matter | Grade-specific controlled limit                         | Approved method                 |

## 3. Packaging and release documentation

| Package size | Container / format                                 | Supply status        |
|--------------|----------------------------------------------------|----------------------|
| 500mL        | Compatible container selected by product and grade | Available on request |

Each released batch is supported by a batch-specific Certificate of Analysis. Packaging sizes are consolidated in this document; actual availability, closure system and minimum order quantity are confirmed with the quotation.

## 4. Document control notice

This downloadable file is a reference summary generated from the LANCHROM product catalog. Request the current approved specification, SDS and sample COA before method validation, supplier qualification, regulatory submission or purchase release.
