

# Karl Fischer Reagent - Volumetric (Two-Component)

Reference Standards & Analytical Reagents | Karl Fischer Reagents

Two-component volumetric Karl Fischer titrant and solvent system for accurate water content determination from ppm to percent level.

## 1. Product identity and grade scope

|                   |                                                   |
|-------------------|---------------------------------------------------|
| Product name      | Karl Fischer Reagent - Volumetric (Two-Component) |
| CAS number        | -                                                 |
| Molecular formula | -                                                 |
| Molecular weight  | -                                                 |
| Available grades  | HPLC Grade                                        |
| Product category  | Karl Fischer Reagents                             |

## 2. Recommended applications

- 01 Solvent water content QC
- 02 Raw material moisture testing
- 03 Finished product water content verification

## 3. Physical and handling information

|                    |                                                                 |
|--------------------|-----------------------------------------------------------------|
| Appearance         | Confirm in the current grade-specific specification             |
| Storage conditions | Follow the current Safety Data Sheet and approved product label |
| Shelf life         | Confirm for the selected grade and packaging format             |

## 4. Consolidated packaging options

| Package size | Container / format | Supply status |
|--------------|--------------------|---------------|
| 500mL        | AMBER GLASS        | Available     |
| 1L           | AMBER GLASS        | Available     |

All listed packaging sizes are consolidated in this TDS. Final container material, closure, minimum order quantity and availability depend on product compatibility, grade and destination market.

## 5. Storage, safety and documentation

Store in the original tightly closed compatible container under the conditions stated in the current Safety Data Sheet. Protect from incompatible materials and sources of ignition where applicable.

Transport reference: UN 1170 | Hazard class: Class 3 · PG II

Available documents: Product Specification, current Safety Data Sheet, and batch-specific Certificate of Analysis. Contact the LANCHROM technical team for the controlled revision required for qualification or purchasing.

Important: This technical data sheet summarizes product information available in the catalog. It is not a Certificate of Analysis and does not replace the current grade-specific controlled specification or Safety Data Sheet.
