

# Diethanolamine (DEA)

High-Purity Solvents & Chemicals | Pharmaceutical Grade Solvents

## 1. Specification scope

|                 |                                 |
|-----------------|---------------------------------|
| Product         | Diethanolamine (DEA)            |
| CAS number      | 111-42-2                        |
| Grade scope     | Pharma / G2 / G3 / G4 / G5      |
| Document status | Reference specification summary |

The values below are representative catalog specifications. Where several grades are listed, acceptance limits may differ by grade. The current controlled grade-specific specification agreed at quotation or qualification is the governing document.

## 2. Test requirements

| Test item | Specification / reference value | Test method |
|-----------|---------------------------------|-------------|
|-----------|---------------------------------|-------------|

## 3. Packaging and release documentation

| Package size          | Container / format                                 | Supply status        |
|-----------------------|----------------------------------------------------|----------------------|
| 1L                    | Compatible container selected by product and grade | Available on request |
| 4L                    | Compatible container selected by product and grade | Available on request |
| 20L                   | Compatible container selected by product and grade | Available on request |
| 200L                  | Compatible container selected by product and grade | Available on request |
| IBC / bulk on request | Compatible container selected by product and grade | Available on request |

Each released batch is supported by a batch-specific Certificate of Analysis. Packaging sizes are consolidated in this document; actual availability, closure system and minimum order quantity are confirmed with the quotation.

## 4. Document control notice

This downloadable file is a reference summary generated from the LANCHROM product catalog. Request the current approved specification, SDS and sample COA before method validation, supplier qualification, regulatory submission or purchase release.
