

# UV-VIS Absorbance Standard Solution

Reference Standards & Analytical Reagents | Physicochemical Calibration Standards

## 1. Specification scope

|                 |                                     |
|-----------------|-------------------------------------|
| Product         | UV-VIS Absorbance Standard Solution |
| CAS number      | -                                   |
| Grade scope     | USP Grade                           |
| Document status | Reference specification summary     |

The values below are representative catalog specifications. Where several grades are listed, acceptance limits may differ by grade. The current controlled grade-specific specification agreed at quotation or qualification is the governing document.

## 2. Test requirements

| Test item           | Specification / reference value                                      | Test method      |
|---------------------|----------------------------------------------------------------------|------------------|
| Grade/Performance   | Traceable to NIST Standard, Accurate certified value, Good stability | Specification    |
| Product Scope       | laboratory use                                                       | Catalog          |
| Available Packaging | 100mL                                                                | Catalog          |
| Documentation       | CoA/SDS/TDS available on request                                     | Document control |

## 3. Packaging and release documentation

| Package size | Container / format                                 | Supply status        |
|--------------|----------------------------------------------------|----------------------|
| 100mL        | Compatible container selected by product and grade | Available on request |

Each released batch is supported by a batch-specific Certificate of Analysis. Packaging sizes are consolidated in this document; actual availability, closure system and minimum order quantity are confirmed with the quotation.

## 4. Document control notice

This downloadable file is a reference summary generated from the LANCHROM product catalog. Request the current approved specification, SDS and sample COA before method validation, supplier qualification, regulatory submission or purchase release.
